**lotus[®] Sanitizing System[™] Turns Ordinary Tap Water
Into Super-Oxygenated Agent For Sanitizing Fruit And Vegetables**

*Natural, Chemical-Free “Green” Breakthrough Effectively Kills Microbes and
Most Toxins, Yet is Safe Enough Even for Babies or People with Sensitive Skin*

ONTARIO, CANADA – Tersano, a company dedicated to changing the way we think about cleaning chemicals, has revolutionized household cleaning and sanitizing through its new lotus[®] Sanitizing System[™]. The “green” countertop appliance can replace a cabinet-full of chemical-based spray cleaners, effectively eliminating bacteria such as E.coli and Listeria as well as germs, odors, stains, mold, mildew and pesticides throughout the home.

Named “Best Invention of 2006” by *Time* magazine, the FDA- and EPA-approved System uses Tersano’s unique, patented Oxyshield[®] technology to add an extra oxygen atom to ordinary tap water. The result is a “super”-natural oxidant so clean it actually smells like rain. Not only will lotus[®] Sanitizing System[™] water rid fruit, vegetables and household surfaces of microbes and most toxins, but also it saves homeowners hundreds of dollars compared to commercially-produced cleaning products that can potentially harm the environment and their health.

“There are a lot of ‘green’ and ‘natural’ products out there, but they still come with industrial-grade Material Safety Data Sheet (MSDS) information that tells you to wear rubber gloves or safety glasses as a precaution,” said Steve Hengsperger, President of Tersano. “With our product, there’s no MSDS sheet—it’s totally natural.”

Proven Safe, Effective

Oxyshield[®] technology draws from techniques widely used by progressive hospitals worldwide to clean and sanitize surgical instruments. Ozone is a safe and natural sanitizer that is harmless to healthy cells. The ozone-laden water produced by the lotus[®] Sanitizing System[™] has been

proven highly effective as an all-purpose sanitizer for surfaces and other items; it also neutralizes 99.9% of bacteria and reduces pesticides on foods.

The lotus[®] Sanitizing System[™] produces super-oxygenated water ideal for sanitizing and deodorizing cutting boards, kitchen counters, stovetops, utensils, sinks, toilets, garbage cans or diaper pails. It is an excellent way to get rid of tough stains such as coffee, blood and pet accidents, and is safe enough for pets and even babies. Active for about an hour, the “super” water eventually turns back into ordinary water and pure oxygen.

“We have all but eliminated smoking in our society to safeguard our health. Yet cancer rates are still rising, asthma rates are rising, and it’s time to face the fact that many of the household chemicals we use may not be good for us,” said Hensperger.

Multiple Approvals

In addition to EPA and FDA approval, the lotus[®] Sanitizing System[™] is approved by Underwriters Laboratories (UL) and the Occupational Health and Safety Administration (OSHA).

The lotus[®] Sanitizing System[™] comes with a base unit, an all-purpose sanitizing bowl, a spray bottle, booster cartridge and two microfiber cloths. The Tersano lotus[®] product line also includes toothbrush bowls for sanitizing toothbrushes and dentures, as well as a baby bottle bowl that can be used for baby bottles, pacifiers and small toys.
